Part 3. Read the passage and choose the best option A, B, C or D to answer the questions from 1 to 20.

Passage 1.

Music has been integral to our lives. Not all types of music have favourable effects, for example, if it is too loud or noisy or it distracts us from our work. However, in general, surprising benefits for health of music exposure have been discovered.

Overall, music has beneficial effects in pain relief. Listening to music can reduce sensation caused by chronic pain by up to 21% and depression by 25%. Music therapy, therefore, has been applied together with medication to reduce pain during childbirth and surgeries.

Research also shows that music also modifies heartbeat and blood pressure within a positive range. The heart beats faster as we listen to lively music and when the music slows, so do our heart and breath rate. In another study, old people suffering from high blood pressure reported significantly lower blood pressure as a result of listening to calm music after 30 minutes.

Apart from all those benefits, other effects are related to better sleep, strengthened memory and better general health. Most researchers conclude that our preference of music doesn't play the main role, but the tempo and the theme of the music we are exposed to are the most important factors that affect the remedy results.

Câu 1: *What is the best title for the passage?*

- A. Emotional and physical benefits of music

Passage 3.

Orbis is an organization which helps blind people everywhere. It has built an eye hospital inside an aeroplane and flown it all over the world with an international medical team. Samantha Graham, a fourteen-year-old schoolgirl from England, went with the plane to Mongolia. Samantha tells a story of Eukhtuul, a young Mongolian girl.

“Last year, when Eukhtuul was walking from home, she was attacked by boys with sticks and her eyes were badly damaged. Dr. Duffrey, an Orbis doctor, said that without an operation she would never see again. I thought about all the everyday things I do that she couldn’t, things like reading school books, watching television, seeing friends, and I realized how lucky I am.”

“The Orbis team agreed to operate on Eukhtuul and I was allowed to watch, together with some Mongolian medical students. I prayed the operation would be successful. The next day, I sat nervously with Eukhtuul while Dr. Duffrey removed her bandages. In six months, your sight will be back to normal,” he said. Eukhtuul smiled, her mother cried, and I had to wipe away some tears, too!”

“Now Eukhtuul wants to study hard to become a doctor. Her whole future has changed, thanks to simple operation. We should all think more about how much our sight means to us.”

Passage 4.

Did you know that on average we forget about 80% of the medical information a doctor might give us? This fascinating information came to light as a result of a study carried out by Utrecht University. What is even more interesting is that almost half of what we think we remember is wrong.

Why do you think this is? Well, it's not as **complicated** as you may think. You see, going to the doctor fills most people with anxiety and when we are really nervous and stressed we are more likely to focus on the diagnosis rather than the treatment. Therefore, we know what is wrong with us but have no idea what to do about it.

Here are some good tips to keep in mind when seeing a doctor. Always write down any important information. What would be even better is, if your doctor agreed, to record your consultation. This way, you can replay the advice at home, where you are more likely to **absorb** it. If you believe the situation is serious or you're really worried, seek the help of a family member. Just ask them to accompany you to listen in. This way you can be absolutely sure about what the doctor has told you and avoid falling into the same trap that most people do.
